Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Title: METHOD AND APPARATUS USING HEAT FLUX TO DETECT OR
MEASURE A DEPOSIT LIABLE TO FORM IN A FLUID-
TRANSPORT PIPE

Filed: 6/28/02

Inventor(s): Romanet et al

DETAILED ACTION

REJECTIONS OVER PRIOR ART UNDER 35 U.S.C. § 102:

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

"A person shall be entitled to a patent unless --

the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States."

2. Claims 1, 3-9, and 11 are rejected under 35 U.S.C. § 102(b) as being anticipated by Hausler.

Regarding Claims 1 and 8; a thermal gradient at 2, is formed by heating coil 11 to create the active zone 3. Heat flux is measured by thermocouples 14, 15, 20 and others at Col 4, Li 12-17. Processing and control means are depicted in Fig 3.

Regarding Claims 3-4, 6 and 11; see Col 3, Li 38-41.

Regarding Claim 5; see Col 4, Li 12-17.

Regarding Claim 7 and 9; see Col 1, Li 60 bridging Col 2, Li 23.

REJECTIONS OVER PRIOR ART UNDER 35 U.S.C. § 103:

3. The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

"A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person."

4. Claims 2 and 10 are rejected under 35 U.S.C. § 103 as being unpatentable over Hausler as applied to claims 1 and 8, above, in view of Ludington et al, hereinafter Ludington.

Regarding Claim 2 and 10; Hausler fails to cycle the heat source. Ludington teaches the value of cycling the heat source at Col 20, Li 63 bridging Col 21, Li 27 wherein the heat capacitance is obtained from the amplitude (peak). It would have been obvious to one of ordinary skill in the art at the time of the invention to cycle the heat source because Ludington teaches that more information is in a cycled source.

5. Claim 12 is rejected under 35 U.S.C. § 103 as being unpatentable over Hausler as applied to claim 8, above, in view of Ivanets et al, hereinafter Ivanets.

Serial Number: 10/088 34
Art Unit: 2856

Regarding Claim 12; Hausler fails to use a band for the measurement sensors. Ivanets in the sole figure uses a band for the measurement sensors. It would have been obvious to one of ordinary skill in the art at the time of the invention to use a band for the measurement sensors to avoid penetrating the pipe.

DESCRIPTION OF UNAPPLIED ART:

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure because it teaches other aspects of the invention.

INQUIRIES:

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Jay L. Politzer whose telephone number is (703) 305-4930 and whose facsimile number is (703) 308-7382
